SUMMARY

Frontend-leaning full-stack developer with hands-on experience building CRUD applications using Node.js, Express, and REST APIs. Shipped three full-stack projects featuring dynamic routing, custom shopping-cart logic, in-place content editing, and responsive CSS Grid layouts. Comfortable across the stack from Express routing and JSON data persistence to polished, accessible frontend interfaces. Looking to contribute to a development team while continuing to grow as an engineer.

TECHNICAL SKILLS

- Frontend: JavaScript (ES6+), HTML5, CSS3 / CSS Grid / Flexbox, Bootstrap
- Backend & Data: Node.js, Express.js, EJS, REST APIs, JSON-based persistence
- Tools & Workflow: Git, GitHub, VS Code, Chrome DevTools

PROJECTS

[RecipeVault](#) | Node.js, Express, EJS, CSS | [GitHub ↗](#) | [Demo ↗](#)

- Full-stack recipe manager with complete CRUD functionality — create, edit, and delete recipes through a JSON-backed persistence layer with automatic backups.
- Built in-place recipe editing with a dedicated form flow, plus regex-based parsing to auto-format raw ingredient and instruction text into clean, structured lists.
- Designed confirmation-protected modal windows for destructive delete actions (single-recipe and clear-all), preventing accidental data loss.

[TacoCraft](#) | JavaScript, Node.js, Express, EJS, CSS Grid | [GitHub ↗](#) | [Demo ↗](#)

- Interactive food-ordering app with 6 dynamic recipe options served through a custom REST API built with Express.
- Built a client-side shopping cart from scratch (no framework) — add/remove items, live quantity tracking, and real-time total calculation via array reduce methods.
- Implemented fully responsive layouts across mobile, tablet, and desktop breakpoints using CSS Grid and custom media queries.

[Dev Blog](#) | Node.js, Express, EJS, CSS Grid | [GitHub ↗](#) | [Demo ↗](#)

- Full-stack blog with dynamic routing, server-rendered post pages, and a custom 404 error page.
- Added in-place post editing with automatic "Edited" timestamp tracking, giving readers visibility into content updates.
- Designed a responsive CSS Grid layout with a clean, card-based UI across all screen sizes.

CERTIFICATIONS

- freeCodeCamp — Responsive Web Design
- freeCodeCamp — JavaScript Algorithms and Data Structures

CURRENTLY LEARNING

- freeCodeCamp — Front End Development Libraries
- Udemy — Complete Web Development Bootcamp

EDUCATION

Ivan Trush Lviv State College of Decorative and Applied Arts, Ukraine | Bachelor's Degree in Sculpting

PREVIOUS EXPERIENCE

Freelance Photographer | Managed end-to-end client projects, from acquisition to high-volume digital asset delivery under tight deadlines.

Shift Supervisor & Baker | Oversaw daily operations and quality control in a fast-paced retail environment.
